CAREER SUMMARY

A skilled, technical and result-driven person with hands-on experience in building web and desktop applications using JavaScript and C#.NET technologies, seeking to contribute effectively as a team-oriented Software Engineer at all times in a fast-paced environment whose values include love, impact and personal development

WORK EXPERIENCE

The Bulb Africa, Yaba —Software Engineering Fellow

October 2020 - Present

- Coded with C#, LINQ, ADO.NET, Unit Testing and .NET Ecosystem in general to complete at least 2 applications
- Counseled at least 90% of team members on several grey areas in JavaScript, React.js and C#
- Transformed at least 3 designs and mock-ups to functional code
- Collaborated with 5 team members and 2 senior developers to work on various projects
- Inspected multiple codebases in order to fix bugs and recommended adequate and scalable refactored solutions
- Led a team of 4 fellow engineers to design and deploy **Remuner8**, a payroll web application with React.js, ASP.NET Core API and SQL Server
- Conceived and launched **Divine Global Store**, a fully fledged E-Commerce web application using React.js, Redux, Firebase and Stripe

First Option Private School, Abijo —IT Consultant/Teacher

November 2018 - September 2019

- Prepared Daily or Monthly School Bills/Results for the entire school using MS Excel
- Revamped and Maintained the computer lab to ensure smooth running of 100% of the systems
- Conducted Hardware/Software trouble-shooting & repairs for the computer lab
